

MAIN CABLE HAULING

Underground Cable Hauling and Infrastructure Contractors

COMPANY PROFILE

Main Cable Hauling Pty Ltd is a Melbourne-based specialist contractor delivering underground cable installation projects across energy, telecommunications, infrastructure and transport industries throughout Victoria.

Our structured delivery model integrates detailed planning, engineering and design of cable installation systems supported by a ESI, Rail, Oil & Gas, and Defence qualified workforce, ensuring a safe, compliant, and efficient delivery program within complex infrastructure environments.

PROVEN PERFORMANCE

- Large project experience across Energy, Rail and commercial
- Long-term delivery on national telecommunications infrastructure programs
- Safe execution within live telco networks
- Integrated civil, mechanical and hauling capability reducing subcontractor interfaces
- Rapid mobilisation across metropolitan and regional Victoria
- Safety-first culture

CORE CAPABILITY

Cable Hauling and Installation

- Heavy underground pit & pipe cable hauling
- Heavy calibrated cable winching systems
- Advanced adaptable cable roller systems
- Detailed Telco cable identification, proving and extraction
- Transport and logistics co-ordination

Planning and Engineering

- Civil and mechanical route consulting and design based on decades of industry experience
- Cable hauling plan development and installation simulation

Civil Construction

- Embedded (5T excavator, tipper etc)
- Partner civil (20T+ excavator, tandem etc)
- 24/7 workshop and technical support vehicles

Aligned Services

- Cable and conduit electromagnetic location
- Pit and conduit dewatering and cleaning
- Rodding and roping
- Mandrel proving
- Conduit CCTV inspection
- Established traffic management partners for detailed, complex and compliant TM scheme deployments

PROJECT EXPERIENCE

Renewable Energy Projects

Heavy underground cable installation including pit & pipe, and direct buried for major solar and wind energy projects alongside principle contractors within strict safety and compliance frameworks. Project sizes from multi-km HV grid-feeds (AusNet) to direct buried DC-feeders (Melbourne Water).

Energy, Large Commercial & Infrastructure Projects

Consumer mains installation for large infrastructure projects including Prisons (Ravenhall, Downer), Hospitals (Sunshine, Stowe), Gas (22KV wellhead supply, Halladale, Black Watch and Speculant, Beach Energy) and many others.

Rail

Execution of complex cable installation works including fibre optic, copper signalling (LV) and HV within constrained and live service environments. Extensive work on Regional Rail Link and level crossings removal projects.

Telstra Copper Cable Recovery Program

Over four years of continuous delivery on the copper cable recovery program for Telstra InfraCo. The company has successfully delivered large-scale copper identification, proving, and pit-to-pit recovery works across metropolitan and regional service areas, with exceptional network uptime and safety records. Proven ability to integrate into complex client business systems.

COMPLIANCE AND ACCREDITATION

- Multi industry qualified personnel, including ESI, Rail, Oil & Gas, Defence and others
- Licensed HRW operators and technicians
- National Police Checks and Construction Induction cards
- Site-specific safe work systems

WHY MAIN CABLE HAULING

- Specialist technical contractor
- Innovative engineered cable installation
- Proven performance, decades of industry experience
- Proven ability to reduce project time and cost when engaged at planning stage (greenfield)
- Strong safety and do no harm culture
- Rapid mobilisation across Melbourne and regional Victoria
